Edge

Definitions

Edge

Definitions

Edge

(u, v) is an edge, if u is the parent of v

Definitions

Edge

(u, v) is an edge, if u is the parent of v

Example: $(11, 3)$ is an edge

Definitions

Edge

(u, v) is an edge, if u is the parent of v

Example: $(11, 3)$ is an edge

Definitions

Edge

(u, v) is an edge, if u is the parent of v

Example: $(11, 3)$ is an edge

Path

Definitions

Edge

(u, v) is an edge, if u is the parent of v

Example: $(11, 3)$ is an edge

Path

Definitions

Edge

(u, v) is an edge, if u is the parent of v

Example: $(11, 3)$ is an edge

Path

$p=(v_1, v_2, \dots, v_k)$ is a path, if each two consecutive nodes, forms an edge

Definitions

Edge

(u, v) is an edge, if u is the parent of v

Example: $(11, 3)$ is an edge

Path

$p=(v_1, v_2, \dots, v_k)$ is a path, if each two consecutive nodes, forms an edge

Example: $p_1=(11, 3, 1, 9)$ is a path

Definitions

Edge

(u, v) is an edge, if u is the parent of v

Example: $(11, 3)$ is an edge

Path

$p=(v_1, v_2, \dots, v_k)$ is a path, if each two consecutive nodes, forms an edge

Example: $p_1=(11, 3, 1, 9)$ is a path

Definitions

Edge

(u, v) is an edge, if u is the parent of v

Example: $(11, 3)$ is an edge

Path

$p=(v_1, v_2, \dots, v_k)$ is a path, if each two consecutive nodes, forms an edge

Example: $p_1=(11, 3, 1, 9)$ is a path

Length of a path

Definitions

Ancestor

u is an ancestor of v , if there is a path from u to v

Definitions

Ancestor

u is an ancestor of v , if there is a path from u to v

Definitions

Ancestor

u is an ancestor of v , if there is a path from u to v
(alternatively, if v is in the subtree rooted by u)

Definitions

Ancestor

u is an ancestor of v , if there is a path from u to v
(alternatively, if v is in the subtree rooted by u)

Examples:

-

Definitions

Ancestor

u is an ancestor of v , if there is a path from u to v
(alternatively, if v is in the subtree rooted by u)

Examples:

- 11 is an ancestor of 1

Definitions

Ancestor

u is an ancestor of v , if there is a path from u to v
(alternatively, if v is in the subtree rooted by u)

Examples:

- 11 is an ancestor of 1
-

Definitions

Ancestor

u is an ancestor of v , if there is a path from u to v
(alternatively, if v is in the subtree rooted by u)

Examples:

- 11 is an ancestor of 1
- 5 is an ancestor of 4

Definitions

Ancestor

u is an ancestor of v , if there is a path from u to v
(alternatively, if v is in the subtree rooted by u)

Examples:

- 11 is an ancestor of 1
- 5 is an ancestor of 4
-

Definitions

Ancestor

u is an ancestor of v , if there is a path from u to v
(alternatively, if v is in the subtree rooted by u)

Examples:

- 11 is an ancestor of 1
- 5 is an ancestor of 4
- 8 is an ancestor of 8

Definitions

Ancestor

u is an ancestor of v , if there is a path from u to v
(alternatively, if v is in the subtree rooted by u)

Examples:

- 11 is an ancestor of 1
- 5 is an ancestor of 4
- 8 is an ancestor of 8
-

Definitions

Ancestor

u is an ancestor of v , if there is a path from u to v
(alternatively, if v is in the subtree rooted by u)

Examples:

- 11 is an ancestor of 1
- 5 is an ancestor of 4
- 8 is an ancestor of 8
- 4 is not an ancestor of 11

Definitions

Ancestor

u is an ancestor of v , if there is a path from u to v
(alternatively, if v is in the subtree rooted by u)

Examples:

- 11 is an ancestor of 1
- 5 is an ancestor of 4
- 8 is an ancestor of 8
- 4 is not an ancestor of 11

Definitions

Ancestor

u is an ancestor of v , if there is a path from u to v
(alternatively, if v is in the subtree rooted by u)

Examples:

- 11 is an ancestor of 1
- 5 is an ancestor of 4
- 8 is an ancestor of 8
- 4 is not an ancestor of 11

Descendant

Definitions

Ancestor

u is an ancestor of v , if there is a path from u to v
(alternatively, if v is in the subtree rooted by u)

Examples:

- 11 is an ancestor of 1
- 5 is an ancestor of 4
- 8 is an ancestor of 10
- 4 is not an ancestor of 11

Descendant

u is a descendant of v , if v is an ancestor of u

Definitions

Ancestor

u is an ancestor of v , if there is a path from u to v
(alternatively, if v is in the subtree rooted by u)

Examples:

- 11 is an ancestor of 1
- 5 is an ancestor of 4
- 8 is an ancestor of 8
- 4 is not an ancestor of 11

Descendant

u is a descendant of v , if v is an ancestor of u

Examples:

-

Definitions

Ancestor

u is an ancestor of v , if there is a path from u to v
(alternatively, if v is in the subtree rooted by u)

Examples:

- 11 is an ancestor of 1
- 5 is an ancestor of 4
- 8 is an ancestor of 8
- 4 is not an ancestor of 11

Descendant

u is a descendant of v , if v is an ancestor of u

Examples:

- 1 is a descendant of 11

Definitions

Ancestor

u is an ancestor of v , if there is a path from u to v
(alternatively, if v is in the subtree rooted by u)

Examples:

- 11 is an ancestor of 1
- 5 is an ancestor of 4
- 8 is an ancestor of 10
- 4 is not an ancestor of 11

Descendant

u is a descendant of v , if v is an ancestor of u

Examples:

- 1 is a descendant of 11
-

Definitions

Ancestor

u is an ancestor of v , if there is a path from u to v
(alternatively, if v is in the subtree rooted by u)

Examples:

- 11 is an ancestor of 1
- 5 is an ancestor of 4
- 8 is an ancestor of 10
- 4 is not an ancestor of 11

Descendant

u is a descendant of v , if v is an ancestor of u

Examples:

- 1 is a descendant of 11
- 4 is a descendant of 5

Definitions

Ancestor

u is an ancestor of v , if there is a path from u to v
(alternatively, if v is in the subtree rooted by u)

Examples:

- 11 is an ancestor of 1
- 5 is an ancestor of 4
- 8 is an ancestor of 10
- 4 is not an ancestor of 11

Descendant

u is a descendant of v , if v is an ancestor of u

Examples:

- 1 is a descendant of 11
- 4 is a descendant of 5
